Industrie Biomediche Insubri

SmartBone Technology

SmartBone® is an innovative bone substitute developed by IBI SA, a Swiss biomedical company specializing in tissue engineering and regenerative medicine. It is designed for use in orthopedics, dental, and spinal surgery. SmartBone® combines a bovine-derived bone matrix with bio-degradable polymers and collagen frag-

ments, creating a unique composite that enhances mechanical strength while promoting natural bone regeneration. This makes it highly suitable for reconstructive surgeries where durability and bio-integration are critical. Additionally, IBI SA offers custom-made SmartBone® solutions, tailored to indi-

vidual patients' anatomical needs. These personalized grafts ensure optimal fit and performance, providing better outcomes in complex cases. IBI SA has been at the forefront of medical innovation, developing products that meet high standards of safety and effectiveness. SmartBone® has received the CE mark, validating its compliance with European health and safety regulations.

Innovative Endoscopy Components, LLC

Endoscope CCD' Camera Repair Innovation

In an effort, to make a better and more functional product to serve the requests of our loyal customers, IEC has developed a new design for our small diameter endoscope CCD' repairs. This new design significantly reduces the diameter of the wire harness creating more room for other parts. It gives the endoscope CCD' the ability to angulate and move with less stress on the camera than ever before. We offer

this service to endoscope repair companies and dealers worldwide.

Please contact us: Innovative Endoscopy Components, LLC: 320 International Parkway, Fort Lauderdale, FL 33325, USA
